

Response to Question 43

Inmarsat Hawaii Inc. (“Inmarsat”) is filing this notification of minor modification to inform the Commission that Inmarsat’s Paumalu, Hawaii earth stations are using an emission designator not currently listed on the licenses for those earth stations. As compared to the carriers associated with the emission designators that are listed, the carriers associated with the new emission designators: (i) are of the same modulation type and (ii) have the same or lower associated values for maximum EIRP and EIRP density. Accordingly, no additional coordination is required, and these changes are “minor” under Section 25.118 of the Commission’s rules. 47 C.F.R. § 25.118.
