PROPOSED ANTENNA IS EXEMPT FROM FAA NOTIFICATION

The proposed antenna is exempt from notification to the FAA under Section 17.14(a) of the FCC's rules, 47 C.F.R. § 17.14(a). See also 47 C.F.R. § 25.113(c). The proposed antenna will be located in the existing Castle Rock, CO teleport, and the antenna will be shielded by existing structures of a permanent and substantial character. There are several FCC-licensed earth station antennas located in the teleport at the proposed site that are at heights above ground level that are comparable to or greater than the height above ground level of the antenna proposed in the instant application, including the existing antenna under Call Sign E060382. *See e.g.*, Call Sign E040174, Call Sign E030106. Under these circumstances, it is evident beyond all reasonable doubt that the proposed antenna will not adversely affect safety in air navigation.
