**Re: Application for License Modification of Panasonic Avionics Corporation,
File No. SES-MFS-20120913-00818, Call Sign E100089**

Dear Ms. Dortch:

Panasonic Avionics Corporation (“Panasonic”), pursuant to Section 1.65 of the Commission’s Rules, 47 C.F.R. § 1.65, hereby submits this letter to correct certain information relating to the above-referenced application for license modification filed with the Commission on September 13, 2012.

Panasonic wishes to correct two minor typographical errors regarding the additional satellite points of communication identified in the application narrative and Schedule B of Form 312. First, references to “Anik F1R” should read “Anik F1” located at 107.3° W.L. Second, the directional longitude of the Apstar 7 satellite was inadvertently omitted from the Schedule B entry, which should reflect that Apstar 7 is located at 76.5° “E.L.”

Panasonic would also note one minor discrepancy in the antenna specification sheet prepared for the Aura LE terminal and submitted with the application. *See* License Modification Application, Attachment 2 at 2. Specifically, the receive minimum G/T value should be 10 dB/K rather than 9 dB as indicated. (The 12 dB typical value is consistent with the correct 10-14 dB/K range properly included in the application narrative and technical appendix.) Although the G/T values do not impact the interference potential of Aura LE transmit operations, Panasonic seeks to clarify this issue to avoid any confusion regarding the values.

37 Offices in 18 Countries

Squire Sanders (US) LLP is part of the international legal practice Squire Sanders which operates worldwide through a number of separate legal entities.

Please visit squiresanders.com for more information.

Please feel free to contact the undersigned with any questions you may have or if Panasonic can provide any additional information to facilitate expeditious action on its application.

Respectfully submitted,

Squire Sanders (US) LLP
