

## **QUESTION E18 EXHIBIT – FREQUENCY COORDINATION REPORTS**

### **Astrium Services Government, Inc. (ASGI)**

The C-Band and L-Band Hub antennas which are being added to the Southbury, CT WA28 license are not new facilities. As further explained in the Exhibit for Question 43, these antennas are currently authorized per ASGI's Southbury, CT WB36 license. No change of any kind is being requested to any of the authorizations which are set forth for these antennas in the WB36 license and except for refinement of the response to E11 of Schedule B specifying the latitude and longitude of the antennas, all of the information set forth in Schedule B of this Modification Application adding them to the WA28 license is an exact replication of that which is set forth for the authorizations for those antennas in the WB36 license. ASGI respectfully hereby incorporates by reference the Frequency Coordination Reports which were previously submitted to the Commission in support of the prior WB36 applications which were the basis for those authorizations.
