Re: Panasonic Avionics Corporation – Notification and Request for ESAA Blanket License Modification, File No. SES-MFS-20160819-00730 (Call Sign E100089)

Dear Ms. Dortch:

Panasonic Avionics Corporation (“Panasonic”), in connection with the above-referenced earth station aboard aircraft (“ESAA”) license and pursuant to Section 25.118(a)(4) of the Commission’s rules, submits this notification and request for license modification to remove a downlink frequency associated with ESAA communications with the IS-29E satellite.

In the license, Panasonic’s ESAA terminals are authorized to receive downlink transmissions from the IS-29E satellite in the 12.2-12.5 GHz band based on a request that was erroneously included in the underlying application. Panasonic clarifies that its ESAA terminals have not and will not receive downlink transmissions from IS-29E in the 12.2-12.5 GHz band.

Panasonic acknowledges that the inclusion of the 12.2-12.5 GHz downlink band was in error and hereby requests removal of this downlink band from its ESAA blanket license. This submission is being made in letter form, rather than FCC Form 312 as contemplated by Section 25.118(a), given the unique circumstances of this request for removal of frequencies from the license.

Please do not hesitate to contact me with any questions regarding this matter.

Respectfully submitted,

Carlos M. Nalda
