**Re: RigNet SatCom Inc. – Section 1.65 Submission,
Update Information in Draft Form 312 Schedule B
File No. SES-MFS-20171127-01276, Call Sign E060317**

Dear Ms. Dortch:

After consultation with the Commission staff, RigNet SatCom Inc. (“RigNet”), pursuant to Section 1.65 of the Commission’s Rules, 47 C.F.R. § 1.65, updates certain information submitted in connection with the above-referenced request for application to modify its very small aperture terminal (“VSAT”) blanket license, Call Sign E060317.

RigNet clarifies certain information provided in the FCC Form 312 Schedule B for the Prodelin 1123 antenna (“REMOTE 4”). Specifically, RigNet updates the total input power to 21.6 watts (Item E38) and confirms that the maximum EIRP level for the 4M25G7W carrier is 56.5 dBW/4 kHz (Item E40).

Moreover, RigNet corrects the azimuth and elevation angle limits for the Vertex 11 KPK (“HUB 2”) to 111.7° - 244.1° and 21.0° - 25.4°, respectively, for transmit and receive frequencies.

No other information in support of this request has changed. Please do not hesitate to contact me with any questions regarding this matter.

Respectfully submitted,

A handwritten signature in black ink that reads "Carlos M. Nalda". The signature is written in a cursive, flowing style.
