**Re: Panasonic Avionics Corporation – Section 1.65 Submission
Modification Application File Nos. SES-MFS-20180122-00052, SES-AMD-
20180208-00096 & SES-AMD-20180225-00161, Call Sign E100089**

Dear Ms. Dortch:

Pursuant to Section 1.65 of the Commission's rules, 47 C.F.R. § 1.65, Panasonic Avionics Corporation ("Panasonic") hereby clarifies certain information in the above-referenced application to modify its earth station aboard aircraft ("ESAA") blanket license, as amended ("Modification Application"), in response to an inquiry from the International Bureau staff.

First, in the Modification Application narrative, Panasonic included a request to correct the satellite arc for the Apstar 7 satellite in "Section C (Frequency Coordination Limits)" of the license. This was a typographical error and Panasonic clarifies that this request should be in reference to the *Apstar 6* satellite. Accordingly, Panasonic requests that the Commission update Apstar 6 satellite arc range in Section C of the ESAA blanket license to "134E-134E."

Second, Panasonic requested that certain additional receive frequencies be included in "Section B (Particulars of Operation)" of the license outlining authorized parameters of its ESAA terminals. Panasonic acknowledges, however, that Section C of the license correctly captures all of the frequencies used by the ESAA terminals with each satellite point of communication, including the receive bands at issue. Thus, Panasonic agrees that no further action is required and respectfully withdraws this request.

Please do not hesitate to contact the undersigned with any questions regarding this matter.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Jason Davila", is written over a circular stamp or watermark.
