

SES-MFS-20190819-01046, Call Sign E080084

Please accept this pleading to clarify that SES-MFS-20190819-01046 for Call Sign E080084 is meant to replace the two existing emission carriers 51K2 and 36M0 for the 6.1m antenna that were authorized with eirp densities 39.3 dBW/4kHz and 36.69 dBW/4kHz, respectively. These carriers no longer apply with the decreased eirp density level of 34.2 dBW/4kHz for emissions 51K2G7W and 36M0G7W. Also, this pleading clarifies that each of the two emission carriers (51K2G7W and 36M0G7W) are for communicating with each added satellites, ARSAT-2 and ANK F1R.
