Re: Call Sign E990398

September 9, 2008

Kathleen:

Here's the order of events supported by documents as well as my notes during phone conversations with the FCC Revenue & Receivable Operations Group:

1. Satellite Truck was sold to North American Communication on 10-15-04 and FCC 312- Schedule A "Consent to Transfer of Control" form was filed along with FCC Form 159 and \$445 filing fee paid by North American Communication's president Gary Oksutcik.
2. In January of 2006, Peak Uplink received notification of outstanding Regulatory Fees for the call sign. I called the FCC (1-202-418-1995) and spoke with Evelyn who asked for supporting documents to be faxed to her and additionally suggested that I write to Marvin Washington, Credit Manager of the Revenue & Receivable Operations Group, to request that the overdue sum be cleared from our account.
3. In August of 2007, Peak Uplink once again received a bill for collection. I called the above number on 9-5-07 and spoke with Judith who requested that I fax her the documents and she would take care of it.
4. In June of 2008, I again received a bill for collection of the regulatory fees and again called the above number on 07-01-08 and spoke with Judith who said she had tracking numbers to deactivate the call sign (#6769 and #6966) and that this should take care of the problem. She said I was to ignore any further bills for that call sign. "This was an internal billing problem" and I "was not the only person to call her with this issue."
5. On 9-06-08, Peak Uplink received another bill for collection of Regulatory Fees for this call sign plus five of our six call signs for our Satellite trucks. I went on-line and to pay for the valid 2008 call sign fees and saw that our account had been "Red Lighted" for non-payment of fees for the call sign E990398. I called the Revenue & Receivable Operations Group and spoke with Shari who said that the de-activation was in their system and she didn't know why this was happening.

She was the first person in the past four years to suggest that I call IBFS to see if the problem could be fixed. I called you.

6. Additional information: The satellite truck carrying the dish with the call sign E99398 suffered a rollover accident and the entire truck with dish was totaled around Thanksgiving , 2005. North American Communication filed Chapter 11 within the past two years, and Pres. Gary Oksutcik now runs North American Television.

I appreciate your immediate response to my telephone message, and look forward to working with you to correctly rectify this situation.

Sincerely,

Kinga A. Fauser
Secretary/ Treasurer
