C-Band Transmit and Receive Earth Station  
Call Sign: E860175  
Updated Emission Designators

Dear Ms. Lam,

The license for this earth station lists emission designator in the old format. The updated emission designators and associated powers are listed below.

Updated Emission Designators

<u>Receive Band</u>	<u>Transmit Band</u>
100KF0N	36M0F8W
36M0F8W	36M0G7W
85K0G7W	85K0G7W
750KF2D	750KF2D

Associated Transmit Powers

	<u>36M0F8W</u>	<u>36M0G7W</u>	<u>85K0G7W</u>	<u>750KF2D</u>
Max. Available RF Power (dBW)/4 kHz)	-3.00	-15.34	-11.5	-6.04
Max. EIRP (dBW)/4 kHz)	50.80	38.46	42.30	47.76
(dBW)	77.80	78.00	55.47	70.49

Our database has been updated to include the updated emission designators.

This earth station has been licensed at the worst case power (highest power) of -3.0 dBW/4KHz. Comsearch has protected this site for the last several years at the -3.0 dBW/4KHz power. This update in the emission designators will have no affect on the microwave environment and should be considered minor in nature.

If you have any question please call me at (703)-726-5665.

Sincerely,

Comsearch
