Re: AutoGrant Check corrections to ESL E950068.

Hello Towanda,
I received your e-mail regarding Entravision Holdings modification. The look angles need to be changed to 27.1 from 36.8, and 118.1 form 92.9.

On the other item the applicant is now requesting a 16-Watt. Not the 40-Watt. Here are the calculations based on the 16 Watt.

	Antenna Gain (dBi)	Max Power / Carrier (W)	Tx Power (dBm)	Back-off (dB)	Max EIRP (dBm)	Max EIRP (dBW)
Channel Master 2.4 m, 16 watt	49.1	16	42.04	6.50	84.64	54.64

	W (10 ^{EIRP/20})	BW (kHz)	P/4kHz (W)	P/4kHz (dBW)	Density (CCIR)
Channel Master 2.4 m, 16 watt	539.59	400	5.40	14.64	34.62

Sorry for the delay on the response. If there are anything else you need me to change please let me know by email using troyshoemaker@clearchannel.com.

Best Regards,

Troy Shoemaker
