**Re: Satamatics, Inc. (f/k/a Richtec Incorporated)  
Call-sign E020074 - File No. SES-MOD-20031126-01728**

Dear Ms. Dortch:

On May 4, 2004, Satamatics, Inc. ("Satamatics")<sup>1</sup> was granted the above-referenced modification to its blanket authorization to operate up to 25,000 Inmarsat D+ mobile earth terminals ("METs") in the United States.

As a condition of this license, Satamatics is required to modify its authorized METs to facilitate average shutdown times of 1.35 seconds, and a maximum shutdown time of 2.6 seconds, in order to improve the protection for the Global Maritime Distress and Safety Service ("GMDSS"). As part of its modification application, Satamatics committed to make the necessary software and hardware modifications to its Inmarsat D+ METs within 6 months (*i.e.*, by November 4, 2004) of the Commission's grant of the above-referenced Satamatics modification application. In addition, it committed to make any required hub modifications to the land earth station ("LES") within 12 months (*i.e.*, by May 4, 2005) of the Commission's grant of the above-referenced modification application.

On October 29, 2004, Satamatics notified the Commission that it had completed the necessary MET modifications as required in its authorization. By this letter, Satamatics is notifying the Commission that it has completed the necessary LES modifications as required in its authorization. A separate copy of this letter is being forwarded to NTIA.

If you require any additional information concerning these modifications, please let me know, or feel free to contact Satamatics's counsel, Alfred Mamlet and Marc Paul of Steptoe & Johnson LLP (202.429.3000).

Sincerely,

Brian R. Hester  
President & COO  
Satamatics Inc.
