CSC's ability to construct the station has been delayed because of a required modification to the zoning permit for the earth station. In its last extension request, CSC reported that the modified permit had been obtained. This was in error. CSC represented at the time of the request that the modified permit had been obtained based upon assurances that it would shortly be granted. In fact, the grant never arrived and CSC's zoning request remains pending.

CSC respectfully seeks a one year extension of time so as to accommodate the zoning process and to allow CSC ample time to contract for the construction of, and actually construct, facility subsequent to a grant of its zoning permit.
