Subject: Earth Station Application

This e-mail is in regards to FCC File Number [SES-MOD-20040430-00619](#) and Call Sign E970347. As we discussed, on April 30, 2004, GTECH Corporation filed an application for modification of its VSAT network license. Due to an inadvertent error, the answers provided on FCC Form 312 for questions 30-34 were all marked "Not Applicable." Please be advised that the correct answers to each of the four questions was "No." GTECH requests that, by this e-mail, you permit GTECH to modify its pending application to provide a response of "No" to each of questions 30-34.

In addition, GTECH requests that its earth station application be treated as a request for the addition of two antennas -- a 4.9 meter antenna and a 7.6 meter antenna.

Please let me know if you have any questions about this matter. Thank your for your assistance.
