Towanda,

I apologize for the delay. I was verifying the capability of the customers remote earth terminal before ammending the Modification application.

Please change our application - SES-MOD-INTR2005-01312, Form 312 - Schedule B, E38. to 327.52 watts and E40. to 74.15 dBW. These two values are the summation from the original filing with the addition of the digital video carrier.

Thank you for your assistance with this matter. If you have any further issues or questions please don't hesitate to contact me.

Best regards,

John W. Whetstone

I haven't received you email in ref. to the changes to the mod application that we talked about. Please send ASAP to avoid the application being returned because of it being unacceptable for filing.

Tnx. T.
