Towanda,

Please go ahead and reduce EIRP and EIRP Density by 2.77 dBW. If you need anything else from me, please let me know.

Thanks,

Frank

You still have to lower the power EIRP 75.30 by 2.77 and the EIRP Density by 2.77, did you give the auto grant check sheet to an Engineer to review?

tnx. T.

Hi Towanda,

Pursuant to your fax of 7/13/05, please revise the above modification application for Earth Station E000577 to decrease the maximum total input power at antenna flange for Antenna 1 (3.8 meter) (which is not being deleted) to 450 watts.

Please let me know if you need any further information.

Thanks, Ann

Great. I will do that today.

Ann

No formal amendment is needed, just send me an email with the changes.

Enjoy your weekend!!

Tnx. T.

Hi Towanda,

I spoke with Trang Nguyen who explained how the situation arose. The licensee is willing to lower its power for the 3.8 antenna as you requested. I plan to file an amendment today or Monday. Please let me know that you receive this e-mail and will not be dismissing the application.

Thanks, Ann

Hello, I need an answer on this like today or no later than Monday, or your application will be returned without prejudice to refile at a later date.

Tnx. T.

Hi Towanda,

We received your fax stating that this modification application for E000577 can't be routinely processed as the power for Antenna 1 exceeds the maximum. However, the only modification being made to E000577 is deleting the two antennas under Antenna ID 2 and the frequencies associated with them. No change is being made to Antenna ID 1 or its frequencies. Please let me know if this resolves the issue or whether we need to take further action.

Thanks, Ann
