Subject: Change FRN Request

Per the FCC Helpdesk I had sent you a request to change some FCC call signs which were assigned to SES Americom to reflect the FRN which is used for call sign maintenance in IBFS, rather than the FRN used for Assignments, Transfer of Control and like transactions. The request was for the following FCC call signs transferred from FRN 0003762366 to FRN 0006383558:

E000102 E000152 E000696 E000726 E020071 E980076

One of the call signs is waiting for a modification to be filed and I was curious if there any status you can give me for this request?
