Eleanor

I have entered data through E60 and the Emission Designator on E47 on the Frequency Tab is 4N34G27. I not sure what I'm doing wrong.

Because of new construction at the University we had to move the Antenna from a ground installation to the roof of the building. The new location information was entered on E35--E39. We have reduced are operating power from 300 Watts to 40 Watts. We have changed our Modulation service on E50 to 5MBPS, QPSK, DVD, MEP2.

There are 2 copies of the Antenna Information but 1 of them is empty and with out validation this form should not have been saved and filed.

[Oh yes you did, But where is the technical data that you are changing like your new emission designator? What in the world are you trying to do on this Mod request application? You need to let me know.](#)

Thanks

Hello Mr.. Dow,

Your application that you filed on December 22, 2005, E880833 for a Modification needs additional information and is unacceptable as filed. Your FCC Form 312 Schedule B for the changes you state in your application is blank for technical data to be changed as requested such as site tab and the frequency E28-E49 of the FCC Form 312, therefore your application is subject to be dismissed without prejudice. Please clarify or submit by close of business on January 13, 2006.

Thank You
Eleanor Lott
