Re: Section 1.65 Update to IBFS File No. SES-MOD-20040124-00090
Update to Application to Modify Satellite Earth Station E900081

Dear Ms. Dortch:

GeoLogic Solutions, Inc. ("GeoLogic"), licensee of satellite earth station E900081 ("Earth Station"), by its attorneys, hereby files this letter pursuant to Section 1.65 of the rules of the Federal Communications Commission ("FCC" or "Commission") to update the above-referenced application ("Application") seeking FCC consent to modify the license term of the Earth Station authorization to permit GeoLogic to operate its currently licensed 50,100 half-duplex mobile earth terminals ("METs") in the lower L-band for an additional four years, until July 2, 2010. GeoLogic explained in the Application that, in June 2005, it introduced a new protocol which enables faster preemption of the METs. This protocol, the MAP protocol, is a software and registration process that enables the use of the signaling channel for short outbound data messages to be delivered faster than would be possible using Standard C protocol.

Please do not hesitate to contact the undersigned with any questions regarding this matter.

Sincerely,

Tom W. Davidson /kum
