Subject: Chevron USA Inc. - Confirmation of superseding applications

Dear Eleanor and Trang:

Please let me start by thanking the both of you for all of your time and patience. You have been very responsive and I appreciate all of your hard work. Following up my conversation with Eleanor yesterday, we have prepared and electronically filed Amendments to the applications that request modified authority for the remote terminal units. The file number of the modification applications that are being amended are:

SES-MOD-20051115-01584 E900691
SES-MOD-20051115-01583 E900689
SES-MOD-20051115-01586 E900690
SES-MOD-20051115-01585 E920268

We also withdrew the application for modification and the Request for STA for station E900688. The file numbers are below:

SES-MOD-20060210-00231
SES-STA-20060210-00232

A superseding application for modified authority and the Request for STA, which is very much needed, for station E900688 was prepared and electronically submitted this evening. A copy of the IBFS account summary and the FCC Form 159 credit card receipt are attached to provide you with the application submission IDs.

Should you have any questions regarding these applications, please let us know. Thank you! - Elizabeth
