Subject: Parameter Corrections to SES-MOD-20070322-00395

Thank you for your review and request for corrected parameters in the above listed application. I've believe that I have listed the revised parameters that we need to submit below.

We respectfully request that our current Form 312 – Schedule B application and the existing station license be revised according.

Please let me know if I've missed something and other information is required.

Thank you very much for your help on this matter.

Best regards, Steven Moreen
