**43. Description. (Summarize the nature of the application and the services to be provided).**

By this Application, Telenor Satellite, Inc. seeks authority to authorize up to 300 C-band terminals for ESV operation. These terminals, all with Seatel 9797 or 9707 antennas 2.4 meters in diameter, will be located on vessels traveling in U.S. and international waters, and will operate with a 13 meter Universal hub antenna at Santa Paula, CA that already has been licensed by the Commission. See File No. SES-MOD-20061207-02107, granted Jan. 17, 2007. These operations will be in the standard C-band, and all operations within 200 km of the U.S. coastline will be on coordinated frequencies. As set forth in the attachments, we are seeking a limited waiver of certain provisions of the Commission's ESV rules, specifically Sections 25.205(a), 25.221(a)(7), 25.221(c)(1), and 25.221(f). In all other respects, the operations described in this application will be in full compliance with the requirements set forth in the Commission's ESV Order, 20 FCC Rcd 674 (2005) and in Part 25 of the Rules.
