Subject: Upload when you come in FW: KA249 SES-MOD-20070523-00709

Hi Jeanette,

Please upload this letter into IBFS. I could only do it in the notes I don't know if need to be in the Other filing. I will copy it into the Notes tab. If you think this should be in the Other filing tab, please upload it.

Thanks,

Trang

Ms. Medley,

I thought it might be useful to provide you with a few bullets from our discussion:

All of the vessels currently receiving C-Band service via KA249 are fully compliant with the Commission's ESV Regulations.

There are a small number of vessels (probably approximately 12) for which upgrades for this capability may still be needed which could possibly request C-Band service via KA249 at some time in the future. These vessels have not yet been upgraded to full compliance either because they have been receiving their service from a non-U.S. provider which does not have to require the capabilities or because the owner has not scheduled the Preventive Maintenance (during which the compliance upgrade can be accomplished).

If one of these non-compliant vessels requests service through KA249 Vizada and it is not feasible to bring them into compliance prior to establishing the service Vizada is able to make sure that the service (if permitted by the FCC) is provided in a manner which guarantees that the ESV's transmissions will not cause interference to a fixed service operator. This is accomplished

by assigning them to a coordinated 6421 - 6423 MHz frequency which is not used for micro wave service.

Rob and I are available at you convenience if you or Mr. Kinsinger have any further questions.

Best regards.

Jim Lovelace
