Towanda,

The Associated Press asked me to look into your questions on the Modification of E980221.

They forwarded the data sheet from you and it appears that your question was on the Ku-band emission designator of the original license? (1M8567D)

I'm certain that must have been a typo from the original license and it should have read 1M85G7D.

Please let me know if this was the only question on the Mod?

You can contact me directly at 703 726-5662 if you would like to discuss?

Thanks!  
Gary Edwards
