To Whom It May Concern:

On September 12, 2007, Clear Channel Satellite Services filed a modification of one of our FCC Licenses, Callsign E000329. At the time, Callsign E000329 had 34 listed Site ID locations, many with multiple antennas. Our modification called for adding a single 2.4M Suman antenna at a new address. This was the extent of our changes during this submission.

Somehow, the contents of our completely separate license, Callsign E050143, which lists a total of 4 listed Site ID locations (total of 1,101 antennas) were transferred onto Callsign E000329 and the 2.4M Suman was added. During this transition all 34 listed Site IDs were apparently removed from E000329.

Prior to receiving the new, erroneous, copy of E000329, we submitted a separate modification of E050143, which will add 1000 1M Patriot antennas, and 100 1.2M Prodelin antennas to that license. This modification is currently under submission to the FCC.

We need all of the previously listed E000329 Site IDs returned to that license, with the previously approved addition of the 2.4M Suman. The Site IDs that were on E050143 need to be returned to that license. These changes need to be made as soon as possible.

Would you please contact me at 303-925-1708 so that I can answer any questions that you may have in regard to this matter? Thank you for your assistance.

Sincerely,

Liz Karr
Office Manager
