Re: Satamatics, Inc.
File Nos. SES-MOD-20071107-01542

Dear Ms. Dortch:

This letter is being submitted on behalf of Satamatics, Inc. ("Satamatics") to respond to two issues raised by the National Telecommunications Information Administration ("NTIA") concerning the above-referenced modification application ("the Modification").

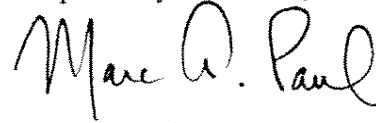

First, NTIA has asked whether the modulation change set forth in the Modification is necessitated by the Inmarsat network or by Satamatics. The modulation change proposed in the Modification is the result of changes that Inmarsat has implemented to its network of satellites that allow D+ mobile earth terminals ("METs") to provide an enhanced form or extension of D+. Inmarsat will be phasing out D+ channel leases on its satellites using the old modulation scheme so Satamatics needs to implement the modulation change in order to continue services to existing customers and to expand its Inmarsat D+ customer base. Further, without the modulation change, Satamatics customers will not have access to the enhanced version of D+. Accordingly, as set forth in the Modification, Satamatics seeks to install a firmware upgrade to its licensed SAT-201 D+ mobile earth terminals ("METs") that will allow these METs to operate under the new modulation scheme.

Second, NTIA has asked whether the METs will continue to meet the IMO SSAS or long range identification & tracking ("LRIT") requirements. Where applicable, the Satamatics D+ METs will continue to meet IMO SSAS and LRIT requirements.

Ms. Marlene Dortch
