Towanda,

Thank you for assistance this afternoon. For both Frequency Rows 7 and 8, please replace the current EIRP Den. (dBW/4kHz) value of 45.42 with 43.10, and replace the current Power Density (dBW/4kHz) value of -0.48 with -2.80.

Please contact me should you require any additional information.

Phil

Towanda,

This message is in response to your request for updated information concerning MTN License Corp.'s 4.1 meter antennas authorized under Call Sign E859623. Please replace the existing information with the new information as indicated below:

Antenna Row 2: Change Max Input Power (W) from 400.0 to 450.0 and change Max Output EIRP (dBW) from 68.9 to 72.43.

Frequency Row 7: Change the information contained in each of the columns to match the information contained in each of the corresponding columns in Frequency Row 8 (for example, change the EIRP (dBW) from 75.80 to 72.40 and the EIRP Density (dBW/4kHz) from 45.80 to 45.42).

Should you require any additional information, please contact Steve Baruch or me. Thank you.
