

MODIFICATION

DIRECTV Enterprises, LLC requests that DIRECTV 12, a new Ka-band satellite to be launched later this year to the nominal 103 WL orbital location, be added as a point of communication for this earth station. The application for DIRECTV 12 (IBFS File No. SAT-LOA-20090807-00086) is currently pending, and launch is expected in the fourth quarter of this year. Grant of this application will ensure that DIRECTV can communicate with this satellite as soon as it is launched.
