

DIRECTV Enterprises, LLC ("DIRECTV") requests that the DIRECTV 9S and DIRECTV 11 Ka-band satellites, currently operating at the nominal 101° W.L. and 99° W. L. orbital locations, respectively, be added as points of communication for this earth station. DIRECTV also requests that DIRECTV 12, a new Ka-band satellite to be launched later this year to the nominal 103° W.L. orbital location, be added as a point of communication as well. The application for DIRECTV 12 (IBFS File No. SAT-LOA-20090807-00086) is currently pending, and launch is expected in the fourth quarter of this year. Grant of this application will enhance DIRECTV's ability to communicate with its existing fleet of Ka-band spacecraft, and ensure that DIRECTV can communicate with its latest satellite as soon as it is launched.
