Re: Call Sign E000048
File No.: SES-MOD-20101004-01271

Dear Ms. Crandall:

On October 4, 2010, PanAmSat Licensee Corp. ("PanAmSat") filed the above-captioned application seeking authority to add points of communications and extended-Ku band frequencies to its fixed-satellite service earth station license for Call Sign E000048. Pursuant to Section 25.112(a)(1) of the Commission's rules, 47 C.F.R. § 25.112(a)(1), we dismiss a portion of the application as defective, without prejudice to refileing.

Section 25.112 of the Commission's rules, 47 C.F.R. § 25.112, requires the Commission to return, as unacceptable for filing, any earth station application that is not substantially complete, that contains internal inconsistencies, or that does not substantially comply with the Commission's rules. A portion of PanAmSat's application contains an inconsistency, which renders that portion of the application unacceptable and subject to dismissal. The deficiency is as follows:

In response to item E43/44 of Schedule B, PanAmSat listed one of the proposed frequency ranges as 13750-13770 MHz with a corresponding emission designator 72M0G7W. The proposed 72 MHz emission bandwidth is wider than the frequency bandwidth for the proposed range.

Accordingly, pursuant to Section 25.112(a)(1) of the Commission's rules, 47 C.F.R. §25.112(a)(2), and Section 0.261 of the Commission's rules on delegations of authority, 47 C.F.R. §0.261, we dismiss that part of the application related to emission designator 72M0G7W.¹

Sincerely,

A handwritten signature in blue ink that reads "Paul E. Blais".

Paul E. Blais
Chief, System Analysis Branch
Satellite Division
International Bureau

¹ If PanAmSat refiles an application containing corrected information for emission designator 72M0G7W, it need not pay an application fee. See 47 C.F.R. § 1.1111(d).
