The answer for 28 should be no. Attached is the Rad HAD.

The instructions on the form for 33-34 are:

"Earth Station applicants not proposing to provide broadcast, common carrier, aeronautical enroute or aeronautical fixed radio station services are not required to respond to Items 30-34."

So N/A is the correct answer as we are not providing any of those services.

Also you checked yes for environmental impact #28 and NA for 30-33 on FCC 312 main form, if so you need an attachment to explain that.
