Re: Enterprise Products, LLC, Application to Modify CSAT Earth Station EO40163,  
File No. SES-MOD-2011032500347

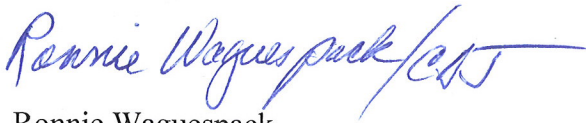

Dear Mr. Blaise:

Reference is made to your conversation with our counsel Douglas Jarrett regarding Conditional Authority for operation of our CSAT system consistent with the referenced application that appeared on FCC Public Notice on April 20, 2011.

This is to confirm that each earth station (hubs and remotes) in this CSAT system will only transmit/receive on a single 20 MHz pair at any point in time consistent with Section 25.115 (c) (2) (i) (C) of the Commission's rules and the CSAT Report and Order, ¶ 13, FCC 01-174, (rel. May 25, 2001). A copy of this letter will be submitted in IBFS and associated with the application.

Should you have any questions, please contact Douglas Jarrett: (202)434-4180  
([jarrett@khlaw.com](mailto:jarrett@khlaw.com)).

Respectfully submitted,

A handwritten signature in blue ink that reads "Ronnie Waguespack" followed by a stylized flourish.

Ronnie Waguespack
