Bedminster NJ 07921

Dear Mr. Conurso,

This letter is to confirm our receipt of technical operating parameters proposed in accordance with our Agreement with SeaTel for the protection of various NASA earth station locations associated with our TDRSS Space Network. We have begun analysis of your technical parameters for coordination purposes and will advise of our findings and any necessary changes once we have completed engineering necessary to establish the pertinent protection contours and prior to executing specific operational agreements.

It is our understanding that you are filing for operating authority from the FCC in parallel with our coordination process. It is also our understanding that our final coordination parameters, contours and agreement will be incorporated into the FCC's action on your filing.

Regards,

[signed]

V. Scott Galbraith
Deputy Spectrum Manager
Goddard Space Flight Center
