Eleanor,

If reference to subject application. Joe Godles called today brought to my attention that I granted LiveTV access to ALSAT. I should have dismissed the application but missed his error so I want to reissue the authorization with LiveTV communicating with Iridium NGS satellite system (S2110)... Joe Godles agreed to this. I have entered the following not into the file, "Per conversation with Joe Godles the obvious mistake of authorizing LiveTV to ALSAT needs correction. We will correct and re-issue the license since this is within 30 days of grant." Please correct to Pntcom for the antenna ID LiveTV and reissue the license.

Thanks,
Paul
