

Description of Request

With this application, Planet Labs Inc. (“Planet Labs”) requests modification of its earth station located in Half Moon Bay, California (Call Sign E140036) to increase the number of antennas authorized under the license from one to two.

The requested second antenna is the same model as the existing antenna and will be co-located with it. Accordingly, the information included in the attached Schedule B is identical to the technical and operational information reflected in the current authorization – with the sole exception of the increase in the quantity of antennas from one to two. As there is no other change to the authorization requested herein, the radiation hazard analyses already on file for Call Sign E140036 is not reproduced.
