

Exhibit A
FCC Form 312, Purpose of Modification: Correction

Please correct the Schedule B Box E38. entry for the “Maximum total input power at antenna flange (Watts)= 33.00” by replacing 33 with the correct value of 2000 so that it now reads: “Maximum total input power at antenna flange (Watts)= 2000”.

This correction is typographical and does not change the interference environment.
