Re: Modification Applications of Globalstar Licensee LLC,
GUSA Licensee LLC, and GCL Licensee LLC

Dear Ms. Dortch:

On April 11, 2017, Globalstar Licensee LLC, GUSA Licensee LLC, and GCL Licensee LLC (collectively, “Globalstar”)¹ submitted companion applications with the International Bureau for minor modification of their licenses, in order to implement Globalstar’s planned terrestrial wireless broadband operations.² As described in the Applications, Globalstar’s terrestrial systems will use its licensed Big LEO Mobile Satellite Service (“MSS”) spectrum at 2483.5-2495 MHz.

In the Applications, Globalstar provided numerous certifications regarding compliance with Part 25 of the Commission’s rules. Globalstar hereby supplements these filings with one additional certification, which is attached to this letter. Specifically, consistent with Section 25.117(c) of the Commission’s rules, Globalstar certifies in the attached Exhibit B that, beyond

¹ Globalstar Licensee LLC is the authorized licensee of the first-generation Globalstar satellite constellation (call sign S2115). GUSA Licensee LLC holds licenses for Globalstar’s earth station gateways located in the continental United States and Alaska and a blanket license for the operation of Globalstar mobile earth station terminals in the United States, and is responsible for the provision of Globalstar mobile satellite services to end users in the United States. GCL Licensee LLC holds licenses for Globalstar’s earth station gateway located in Puerto Rico.

² A list of the nineteen applications filed is attached as Exhibit A, and collectively are referred to as the “Applications.”

Ms. Marlene Dortch

its proposed terrestrial wireless broadband operations, no other information relating to its space station and earth station authorizations will change as a result of the Applications.³

Please contact the undersigned with any further questions regarding the above-captioned Applications.

Respectfully submitted,

/s/ Stephen J. Berman

EXHIBIT B

COMPLIANCE WITH 47 C.F.R. PART 25 – ADDITIONAL CERTIFICATION

47 C.F.R. § 25.117(c). Globalstar's applications for minor modification of its space station and earth station authorizations⁴ propose the deployment and operation of terrestrial wireless broadband operations in Globalstar's licensed Big LEO Mobile Satellite Service spectrum at 2483.5-2495 MHz. The remaining information regarding Globalstar's space station and earth station licenses will not change as a result of these applications for minor modification.

Declaration

I provide this additional certification regarding Globalstar's applications for minor modification of its space station and earth station authorizations under penalty of perjury.
