Subject: Re: Intelsat SES-MOD-20180220-00148

Hi, Anthony,

Thank you for your call just now. As mentioned, the Astronics Aerosat HR6400 has been previously represented in FCC license applications as having a 0.24m diameter.

Please see attached licenses, Call Sign E140087 [SES-LIC-20140902-00688] and Call Sign E120106 [SES-MFS-20171220-01351]. The HR6400 antenna appears in Section E in each case.

Please let me know if I can provide any additional information.

Best regards,

--Rich C.
