Subject: SES-MOD-20180410-00335, E2981

On behalf of EchoStar Broadcasting Holding Corporation, we would like to make the following clarifications and updates to SES-MOD-20180410-00335, E2981. The frequencies for the emission designator 36M0G7W are 3700-4200 MHz (#8 and #16 as listed on the license). The modulation for those frequencies is digital video, voice, and data. In addition, the frequencies listed for emission designator 36M0F8F (#6 and #14 as listed on the license) are no longer necessary and can be deleted. Please let us know if you have any questions.

Sincerely,
Chris
