Re: GCI Eagle River Earth Station, License E2491
Supplement to Pending Modification Application
IBFS File No. SES-MOD-20181030-03537

To Whom it May Concern:

GCI Communication Corp. ("GCI") is the licensee of a C-Band fixed satellite earth station located at Eagle River, AK, Call Sign E2491 (the "License"). IBFS records show that the License is associated with two antenna facilities – (1) Satcom Technologies Model No. 1100C, (Antenna ID: 11.3M); and (2) Satcom Technologies Model No. 1300C (Antenna ID: 13M). GCI wishes to update and correct its antenna information, and remove the 11.3M Antenna from the License.

Accordingly, and pursuant to discussions with FCC International Bureau Staff, GCI submits this letter to supplement its pending modification application for the License, IBFS File No. SES-MOD-20181030-03537 (filed Oct. 30, 2018) (the "Application"). Due to the current filing freeze, GCI is unable to file an amendment to the Application to correct the License's antenna information and therefore, by this letter, GCI requests that IB Staff remove the 11.3M Antenna from the License.¹

Please direct any questions to the undersigned.

A handwritten signature in black ink, appearing to read "Kara Lebin Azocar", with a stylized flourish at the end.

Kara Lebin Azocar
Regulatory Counsel, Federal Affairs
GCI Communication Corp.
