

Exhibit C

FAA Notification Not Required

Per 47 C.F.R. Ch. 1 §17.7(e)(1) and 47 C.F.R. Ch. 1 §25.113(a), FAA notification is not required for this earth station antenna as the proposed antenna structure (a) is shielded by existing structures of a permanent and substantial character and (b) is located in a congested area of Sitka, Alaska where it is evident beyond all reasonable doubt that the structure so shielded will not adversely affect safety in air navigation. There are three (3) metal building structures (warehouses) within 80 feet of this earth station antenna. Additionally, the 9.1m earth station antenna associated with this application was previously licensed with the FCC and has been erected/standing (at this location) since 1991.
