A) This RADIO STATION AUTHORIZATION is granted subject to the following special provisions and general conditions:

- 6 --- Licensee must comply with the license modification and notification requirements of 47 CFR § 25.118 to change the coordinates of its authorized earth station.
- 8 --- Licensee must notify the Commission when all earth stations operating under this authorization are no longer operational or when they have not been used to provide any service during any 6-month operation.
- 5116 --- ALSAT-designated earth stations are permitted to communicate with NSS-7 located at 22.00 W.L. (338.00 E.L.) to provide fixed satellite service in the United States other than direct-to-home service. Provision of direct-to-home services, direct broadcast services, or digital audio radio services are prohibited.
- 5117 --- ALSAT- designated earth stations are granted a waiver of Sections 25.20(g), 25.210(a)(1), 25.210(a)(3), 25.210(i) and 25.211(a) of the Commission's rules, 47 C.F.R. "25.202(g), 25.210(a)(1), 25.210(a)(3), 25.211(a), and 25.210(i) for the limited purpose of communicating with NSS-7 in the conventional C-and Ku-bands, subject to the conditions set forth in its earth station license and set forth in New Skies Satellites, N.V., Petition for Declaratory Ruling, Order, DA 02-1256 (Int'l Bur., Sat. Div., released May 28, 2002), as modified by Public Notice SPB-181, Revision of Permitted List Entry for the NSS-7 Satellite to Remove Coordination Conditions, DA 02-3179 (released November 15, 2002).
- 5118 --- ALSAT - designated earth stations are permitted to communicate with NSS-7, provided that New Skies Satellites, N.V., remains in compliance with all applicable international satellite coordination agreements.
- 5119 --- ALSAT-designated earth stations are permitted to communicate with Solidaridad 2 to provide service in the United States on a non-interference basis relative to two-degree compliant operations.
- 5120 --- In the event that the Commission authorizes access to the U.S. market by a satellite that is two-degree-compliant, and is located within two degrees of Solidaridad 2, ALSAT-designated earth stations are permitted to communicate with Solidaridad 2 to provide service in the United States, but only on a non-interference basis unless and until Satellites Mexicanos, S.A. de C.V. reaches a coordination agreement with that two-degree-compliant satellite system.
- 5121 --- ALSAT-designated earth stations communicating with Solidaridad 2 must meet the requirements of Section 25.212 of the Commission's rules, 47 C.F.R. section 25.212.
- 90398 --- Changes to previously authorized transmitting facilities, operations and devices regulated by the Commission that may have significant environmental impact, and are not excluded by §1.1306, require the preparation of an Environmental Assessment (EA) by the licensee. (See 47 C.F.R. §§1.1307, 1.1308 and 1.1311)
- 90399 --- The licensee shall, at all times, take all necessary measures to ensure that operation of this (these) authorized earth station(s) does not create potential exposure of humans to radiofrequency radiation in excess of the FCC exposure limits defined in 47 CFR §§ 1.1307(b) and 1.1310. Physical measures must be taken to ensure compliance with limits for both occupational/controlled exposure and for general population/uncontrolled exposure, as defined in these rule sections. Compliance can be accomplished in most cases by appropriate restrictions, such as fencing. Requirements for restrictions can be determined by predictions based on calculations, modeling, or by field measurements. The FCC's OET Bulletin 65 (available on-line at www.fcc.gov/oet/rfsafety) provides information on predicting exposure levels and on methods for ensuring compliance, including the use of warning and alerting signs and protective equipment for workers.

B) This RADIO STATION AUTHORIZATION is granted subject to the additional conditions specified below:

This authorization is issued on the grantee's representation that the statements contained in the application are true and that the undertakings described will be carried out in good faith.

This authorization shall not be construed in any manner as a finding by the Commission on the question of marking or lighting of the antenna system should future conditions require. The grantee expressly agrees to install such marking or lighting as the Commission may require under the provisions of Section 303(q) of the Communications Act. 47 U.S.C. § 303(q).

Neither this authorization nor the right granted by this authorization shall be assigned or otherwise transferred to any person, firm, company or corporation without the written consent of the Commission. This authorization is subject to the right of use or control by the government of the United States conferred by Section 706 of the Communications Act. 47 U.S.C. § 706. Operation of this station is governed by Part 25 of the Commission's Rules. 47 C.F.R. Part 25.

This authorization shall not vest in the licensee any right to operate this station nor any right in the use of the designated frequencies beyond the term of this license, nor in any other manner than authorized herein.

This authorization is issued on the grantee's representation that the station is in compliance with environmental requirements set forth in Section 1.1307 of the Commission's Rules. 47 C.F.R. § 1.1307.

This authorization is issued on the grantee's representation that the station is in compliance with the Federal Aviation Administration (FAA) requirements as set forth in Section 17.4 of the Commission's Rules. 47 C.F.R. § 17.4.

The following condition applies when this authorization permits construction of or modifies the construction permit of a radio station.

This authorization shall be automatically forfeited if the station is not ready for operation by the required date of completion of construction unless an application for modification of authorization to request additional time to complete construction is filed by that date, together with a showing that failure to complete construction by the required date was due to factors not under control of the grantee.

Licensees are required to pay annual regulatory fees related to this authorization. The requirement to collect annual regulatory fees from regulatees is contained in Public Law 103-66, "The Omnibus Budget Reconciliation Act of 1993." These regulatory fees, which are likely to change each fiscal year, are used to offset costs associated with the Commission's enforcement, public service, international and policy and rulemaking activities. The Commission issues a Report and Order each year, setting the new regulatory fee rates. Receive only earth stations are exempt from payment of regulatory fees.
