

EXHIBIT

KIRO-TV, Inc. ("KIRO") is the registrant for receive-only earth station E180579.

The instant application proposes to modify E180579 to decrease the number of antenna units from 8 to 6 in the E) Antenna Facilities section. Due to the constraints of IBFS Form 312 modification applications, the form only allows for addition of new data, not removal of old.

KIRO requests the modification of its license E180579 to decrease the antenna units to 6 and to re-issue the license.
