

EXHIBIT REGARDING REQUESTED MODIFICATION AND WAIVER

Citadel Communications, LLC ("Citadel"), registrant of C-band downlink earth station call sign E180334 (IBFS File No. SES-REG-20180515-00720), submits this filing to request the following modifications to E180334's registration:

- **Site ID 1 should reflect the following information:**
 - **2040 Sixth Street, Sarasota, Florida 34237.**
 - **27° 20' 26.17" N; 82° 31' 47.62" W.**
- **Antenna ID 2 should reflect 1 unit, rather than 2, and should be associated with the following site:**
 - **5205 Fruitville Road, Sarasota, Florida 34232.**
 - **27° 20' 20.94" N; 82° 27' 53.58" W.**

The transition to the sites listed above occurred in January 2019 and were necessitated by Citadel being forced to vacate its then-existing studio and move to a new studio at 2040 Sixth Street, Sarasota, Florida 34237. Because the new studio could only accommodate one dish due to space constraints, the second dish associated with Antenna ID 2 was moved to Citadel's transmitter site at 5205 Fruitville Road, Sarasota, Florida 34232. Citadel only recently realized the need to modify E180334's registration to reflect the updated information, and therefore respectfully requests a waiver of any and all Commission rules (including 47 C.F.R. § 25.117) necessary to accomplish the above-noted modifications. Citadel respectfully submits that the public interest favors such a waiver grant here, given that E180334 is an important source of programming for Citadel's locally focused LPTV station, WSNN-LD, and the Sarasota, Florida community that WSNN-LD serves. Additionally, because E180334 is a receive-only earth station, there are no RF transmission or other environmental concerns raised by the relocation of E180334's facilities.
