

## EXHIBIT

Miami Valley Broadcasting Corporation (“MVBC”) is the licensee of receive-only earth station E110159.

One of the antennas listed on the authorization for E110159 is a Ku-band antenna, listed as 3) on the B) Particulars of Operations section on the authorization. This antenna, the 3-4.5M.SC2, should be deleted from the authorization.

Due to the constraints of IBFS Form 312 modification application, the form only allows for addition of new data, not removal of old.

MVBC requests the modification of its license E110159 to delete the Ku band antenna and to re-issue the license.
