

## EXHIBIT

WFTV, LLC ("WFTV") is the licensee of receive-only earth station E4125.

One of the antennas listed on the authorization for E4125, the Satcom Technologies (listed as Antenna ID 1 on the E) Antenna Facilities section on the authorization), is a 5.5 meter antenna, not a 7 meter antenna, as shown on the authorization. All other technical data for this antenna did not change.

In addition, the Satcom Technologies antenna is both a C-band and Ku-band antenna.

All other technical data for all the other antennas listed on the E4125 authorization remain valid and in use and should not be deleted or changed.

WFTV requests the modification of its license E4125 to correct the diameter of the Satcom Technologies antenna to 5.5 meters, and to re-issue the license.
