

Description of Modification

In this application, Viasat seeks an amendment to correct the address and location information previously filed in Form 312 (Schedule B) for the Carlton, MN earth station in call sign E060158 (File Nos. SES-LIC-20060921-01766 and SES-RWL-20211012-01712).

This earth station has been in continuous operation has not moved at any time during the entire prior 15 year license term. Upon renewal it was noted by Staff that the address on file did not appear to show an earth station on Google Earth and Staff was unable to verify location of the antenna. Subsequent investigation by Viasat found that the two digits of the highway road number had been transposed. The correct address of the site is:

1512 Co Road 61, Carlton, MN 55718

The site latitude and longitude coordinate values in Form 312 Schedule B require updating as well from the original values filed. The correct latitude and longitude are:

46° 39' 43.79" N and longitude is 92° 28' 28.38" W.

The proper address, latitude, and longitude values are entered in the corrected Schedule B filed with this amendment.

All other information for the application is correct and remains unchanged.
