<P>10/6/2003 </P>
<P>Hello Mr. Henderson, </P>
<P>You filed a application for a new Receive-Only
Registration Earth Station File No. SES-LIC-20030822-01257, Call Sign E030204
located in Omaha, NE. There are items in your FCC Form 312 application that do
not agree with the frequency coordination technical data. Submit the correct

information requested below in order for your application to be processed for Public Notice.</P>

<P>1. You Antenna Height AMSL cannot be the same as the Site Elevation (AMSL), those are totally different. </P>

<P>2. Your Emission Designator on FCC Form 312 has 2 different Emissions which are not on the Frequency Coordination Data, so which is it going to be?</P>

<P>3. Than you say your site location is in Omaha, NE, but on your Exhibit B Description you say your station location will be in Franklin, LA, now what is going on?</P>

<P>Thank You
