Hello Mr. Ferguson,

You file for a new receive-only registration earth station application "The University of Central Oklahoma" file number SES-REG-20031031-01532, call sign E030268, and on your FCC Form 312 Site Information do not agree with your Frquency Coordination Data for the Longitude Seconds. On you form 312 you have longitude seconds to be "18"W, and on the frequency coordination data sheet the longitude seconds are "15"W, now which is correct, all of your technical data should match and agree with one another. Please submit the correct information for this item.

Thank you
Eleanor M. Lott
