Eleanor,

This is a follow-up to our phone conversation this afternoon regarding the application for the above referenced C-band R/O earth station.

Confirming that there was a typographical error on the FCC public notice for this site and that the N/W latitude and longitude designations were left off and will be reinstated on the next public notice for this antenna.

We would also like to confirm that there were typo's on 312 Main Form and Sched. B, where the correct Y/N buttons were not clicked. The correct answers are as follows:

Main Form:

- 29.) No
- 30.) No
- 31.) No
- 32.) No
- 33.) No

Sched. B:

- 15) Yes
- 16) N/A (is the correct response for this one, since it will operate with FSS, GEO satellites only)

We appreciate all of your help on this, please let me know if you need anything else.

Thank You
Gary Edwards
